PROFILE

I am a 5th-year engineering student at ESIEA Paris, on a double degree with the MSc AI for Business Transformation at SKEMA. I spent four months at TechElevate building an embedded OCR model that reads animal identification ear tags from photos, for a field application intended for 450 agents in Morocco. I am looking for a final-year internship in AI/Data.

EDUCATION

MSc AI for Business Transformation, SKEMA × ESIEA **2026 - 2027**
Engineering Degree in Computer Science (AI & Data), ESIEA Paris **2021 - 2027**

PROFESSIONAL EXPERIENCE

AI & Computer Vision Engineering Intern, TechElevate (Morocco) **2026**

- Designed an offline OCR that reads sheep and goat ear tags, built for 450 field agents.
- Built the data pipeline from PostgreSQL (2.7M records) and Azure through to the mobile app.
- Trained a TrOCR model (PyTorch) restricted to the tag's 8 digits, removing letter/digit confusion.
- Exported to ONNX and quantised to 30 MB for a reading time under 3 seconds on the phone.
- Audited the code: unified 9 metric calculations and removed a hidden network call in a dependency.

Personal Development Project: Huma'Népal **2021 - 2023**

- Vice-President of the association, winner of the 2022 Trophées du Bénévolat Associatif (schooling and IT access project in Nepal).

Crew Member - McDonald's **2024**

- Kitchen service, rotating between stations with customer flow, following hygiene and quality procedures at each one.

ACADEMIC PROJECTS

CAP 4A Project: Autonomous Piezoelectric Street Light **2025**

- Integrated 20 piezoelectric sensors and wrote the ESP32 firmware (C/Arduino) that reports the readings.
- Developed the monitoring platform (Node.js, Express, MySQL) with dashboard, alerts and history.
- Analysed the readings to tune the lighting trigger thresholds.

Scientific and Technical Project: Digital Escape Game **2023 - 2024**

- Designed a voice analysis challenge in Python on a Raspberry Pi.
- Integrated the software and hardware modules into the escape game set.

SKILLS & LANGUAGES

- Programming: Python (advanced); SQL, C, JavaScript/TypeScript (intermediate); R, Java (basic)
- AI & Data: PyTorch, Hugging Face Transformers (TrOCR), ONNX, OpenCV, pandas, NumPy, Matplotlib
- Deployment & Cloud: Docker, Azure (Blob Storage), Google Cloud Platform, Git/GitHub, REST APIs
- Databases & Web: PostgreSQL, MySQL, Node.js/Express, React Native
- Languages: French (C1), English (C1), Arabic (native)
